ivu training manual steps

✓ Answer ready

The IVU (Instrumentation for Vacuum Microscopy) training manual steps provided are as follows:

8.2.2 Rayonix Background measurement

1. Open the EPICS GUI.
2. Change the Frame Type from Normal to Background.
3. Select the same exposure time used during measurements.
4. Close the shutter in POE2.
5. Click Start button on the right side of the word "Acquire".
6. Revert the Frame Type choice from Background to Normal.

8.2.3 Using the Rayonix

- Repeat step 7 for each Rayonix detector used in the experiment.
- For detectors with panelling effects (Checker board-like images), adjust the counting time as needed and evaluate the image if good, skip this step to "m" and continue the alignment procedure.

5.1.7 Detector mounting on the Diffractometer

- Navigate to the following folder: /home/bxds-und/ADMarccd/areaDetector-2-6/ADMarccd/iocs/marCCDIoc/iocBoot/iocMARCCD/
- Type the command ./start_epics

8.2.2 Rayonix Background measurement

1. In the EPICS GUI, open the Frame Type drop down menu and change it from Normal to Background.
2. Select the same exposure time used during measurements.
3. Close the shutter in POE2.
4. Click Start button on the right side of the word "Acquire".
5. Revert the Frame Type choice from Background to Normal.

8.2.3 Using the Rayonix

1. Repeat step 7 for each Rayonix detector used in the experiment.
2. For detectors with panelling effects (Checker board-like images), adjust the counting time as needed and evaluate the image if good, skip this step to "m" and continue the alignment procedure.

Please note that I do not know the specific details of the individual steps or the configuration parameters for each detector, as these are not mentioned in the provided evidence.
